

AGCO™ White Planters® Insecticide Drop Tube Instructions – Rear Mount

Part No. SB020753: bolt-on attachment for 8500 and 8800 series

Drop tube SB020753 is used for all SmartBox® system rear mount applications on AGCO™ White® 8500 and 8800 series planters.

Installation Instructions:

1. Remove the nut and washer from the center bolt of the three bolts that are used to attach the closing wheel hinge assembly to the row unit.
2. Insert the tubes foot down through the opening in front of the closing wheel hinge assembly.
3. Insert the bolt through the tubes mounting tab.
4. Place the washer and nut onto the bolt and tighten.

General Mounting Instructions: Your SmartBox® system requires that a minimum 45 degree angle be maintained at any point along the product discharge path from the meter outlet to the in-furrow drop tube. The drop tube may need to be bent to adjust. The plastic hose should be cut to length to eliminate any unnecessary slack that could cause a flow restriction. Also, if using a seed firmer the drop tube's foot (if applicable) may need to be cut off or bent up if restricting the firmer's travel.

Replacement drop tubes can be purchased directly from:
