

Smart Box System Manager Installation Guide

Step 1: Shut down any programs that are running on your computer. DO NOT CONNECT THE SMART BOX AT THIS TIME.

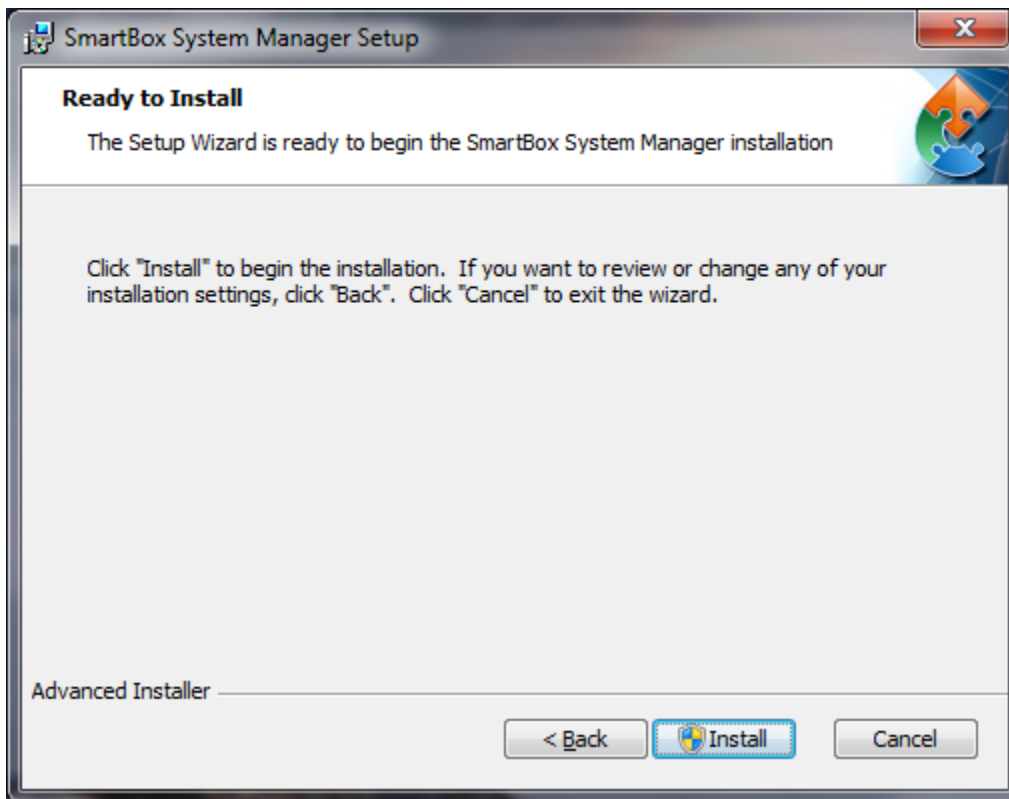

Step 2: Insert the Smart Box System Manager software CD into your CD-ROM drive. The installation wizard screen will automatically appear on your screen within 15 seconds.

NOTE: If the installation wizard does not start up automatically, select your CD-ROM drive from “My Computer” and double-click on the file named “Setup.exe” on the CD-ROM.

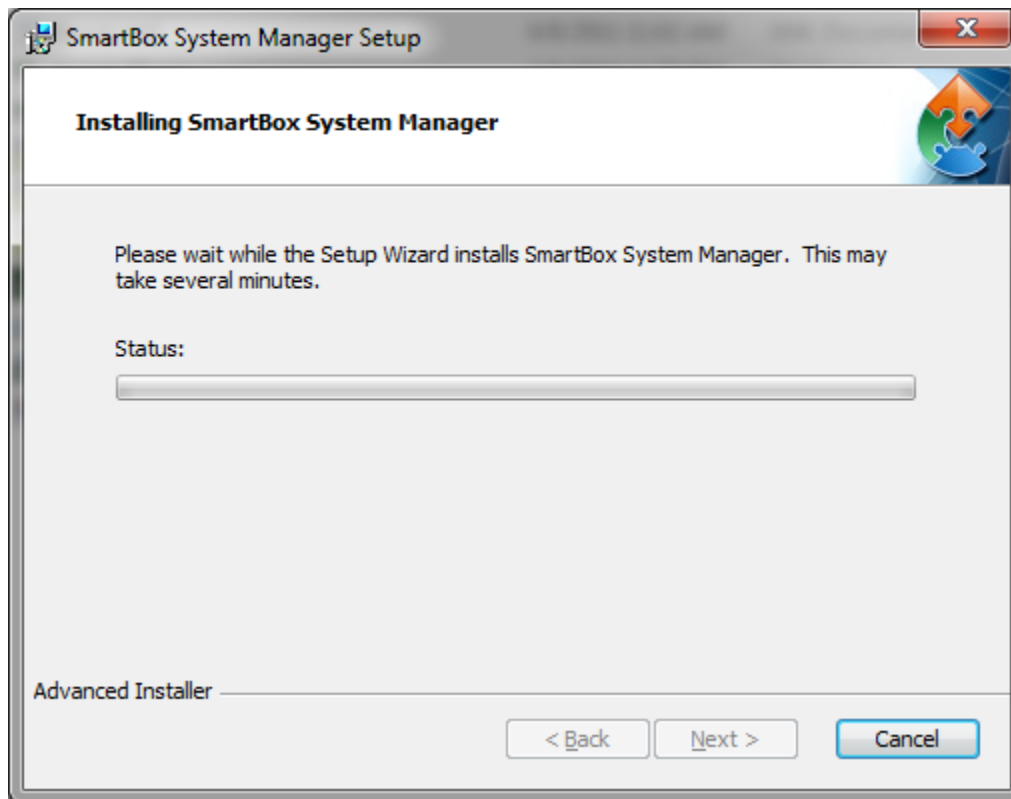

Step 3: You will now see the first of a series of progress screens to help you know where you are in the setup process.

Installation Wizard Step 1: **Press Next**

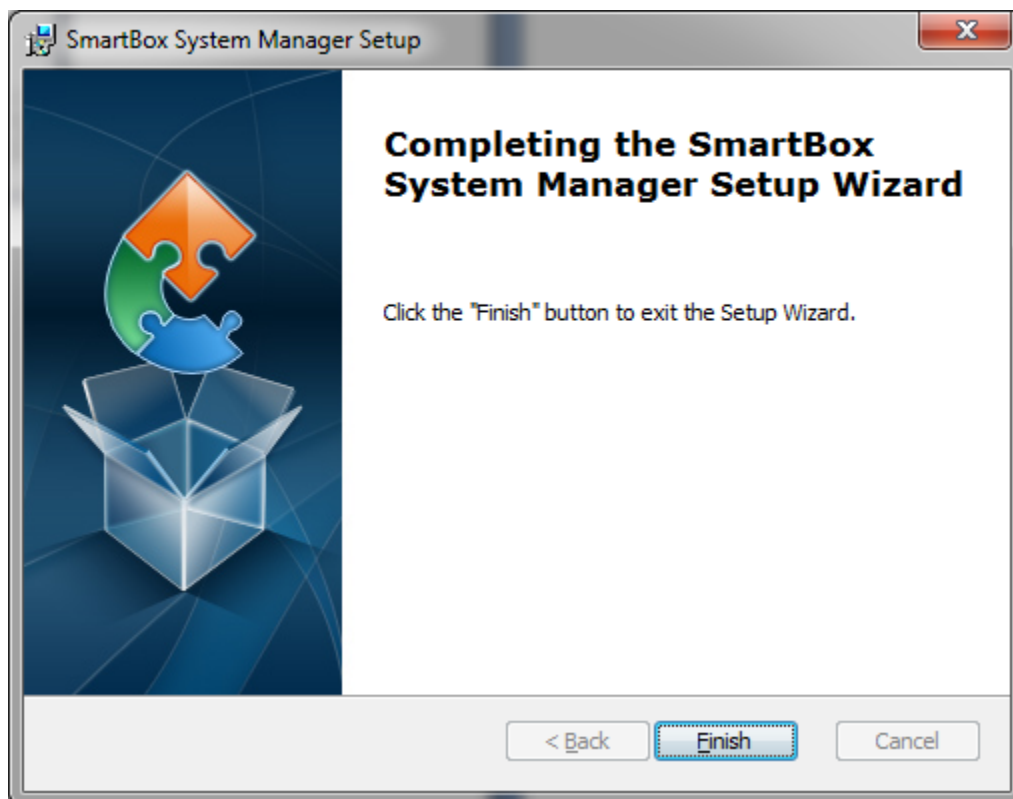

Installation Wizard Step 2: **Press Install**

Installation Wizard Step 3: **Progress shown**

The Smart Box System Manager requires additional software to be present on the computer to operate correctly. During the installation of the Smart Box System Manager, the wizard will detect whether or not those prerequisites are on the computer and install them if they are not. The installation of needed prerequisite software will start a separate installation program that will need to be completed prior to the Smart Box System Manager installation completion.

NOTE: Windows 7 and Windows Vista users may be prompted to allow the installation of the Smart Box System Manager software.

Installation Wizard Complete: **Press Finish**

Starting Smart Box System Manager

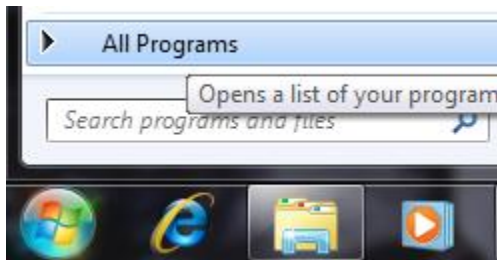

Windows XP/2000

To start the Smart Box System Manager on Windows XP/2000:

Start → Programs → AMVAC Chemical Corporation → SmartBox System Manager

Window 7/Vista

If you are running the Smart Box System Manager on Windows 7/Vista, the application needs to be run as an administrator. Additional security measures introduced with Windows 7/Vista will cause the program to fail if not run as an administrator.

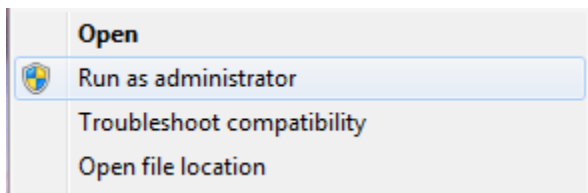

Click on the **Microsoft Windows Icon** and then on **All Programs**.

Click on the AMVAC Chemical Corporation program folder.

Right-click on **SmartBox System Manager** and choose **Run as administrator**

Answer yes if prompted for permission.

Follow the above instructions every time the application is run, to avoid failure.

Setting Smart Box System Manager to always run as an administrator on Windows 7/Vista

If you would like to set the Smart Box System Manager to always run as an administrator on Window 7/Vista, follow these instructions.

Open Windows Explorer by pressing the Folder icon located in the lower-left or by pressing Windows Key-E

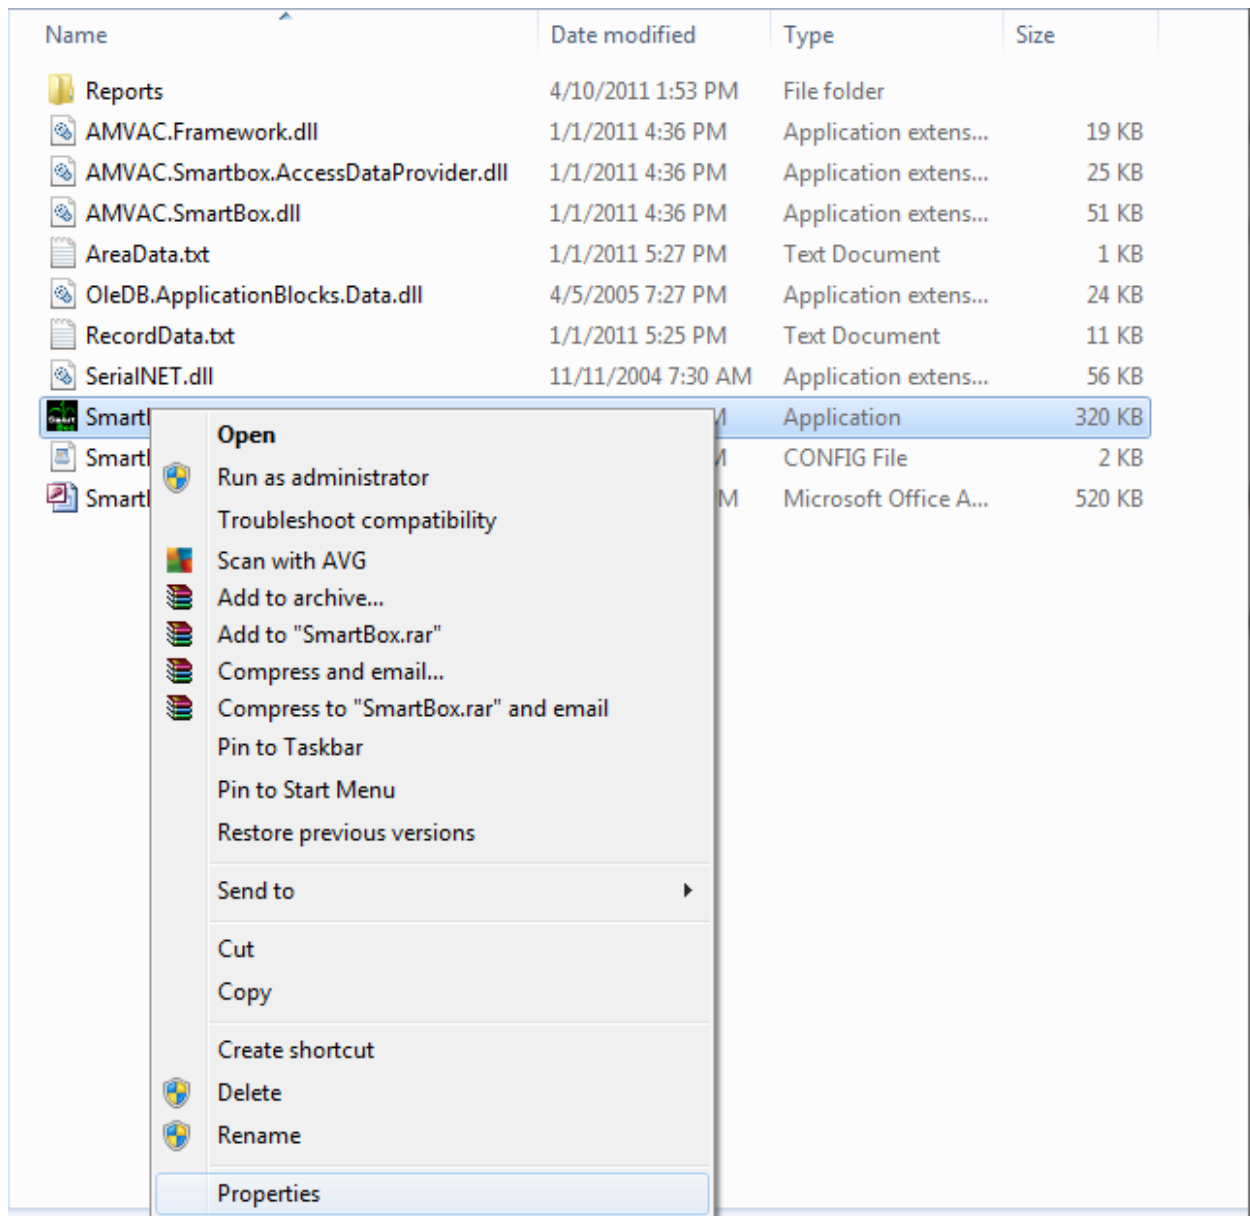

Navigate to the following location:

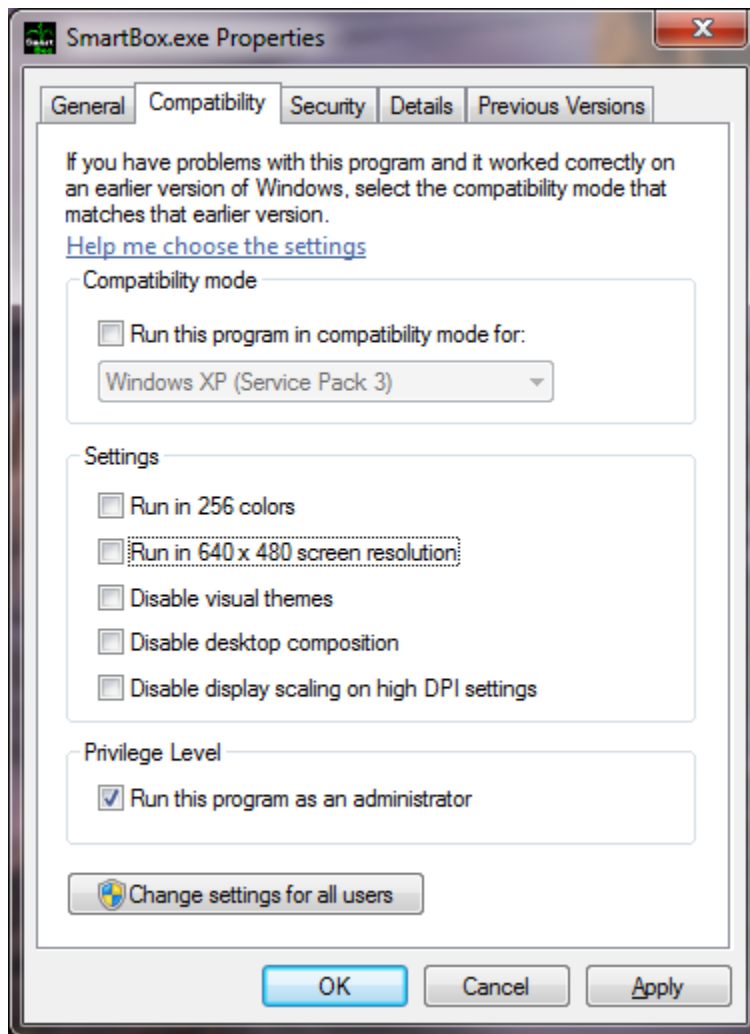

C:\Program Files\AMVAC Chemical Corporation\SmartBox System Manager

If running on 64 bit Windows the location is here:

C:\Program Files (x86)\AMVAC Chemical Corporation\SmartBox System Manager

Right-click on **SmartBox.exe** and choose **Properties**

On the resulting screen, select the **Compatibility** tab and then check the box **Run this program as an administrator** and press **Apply**
